

ナショナル CR-1203(AT-362)配線図

NATIONAL AT-362 CIRCUIT DIAGRAM

Notes :

- 1) If not specified otherwise, all resistors are 1/6 W. (solid resistor)
- 2) $\text{---} \text{---} \text{---}$ chemical condenser
- 3) Given voltages are standard ones indicated on a tester which has 20 K ohms internal resistance.
- 4) Voltages are measured when there is no signal and the pointer is at the maximum receiving position.
- 5) The direction of an arrow head in the symbol of VR points to the direction the contact points move as the sound volume increases.
- 6) Given resistances are direct - current resistances.
- 7) The radio set shown with this diagram is set for minus (-) earth power source.
